

FINISHING YOUR BRACELET

1. LAY OUT THE CORDING

After stringing your beads, tie an overhand knot on each side of the beads. It should be tight but not bunched. Then lay the ends of the cord side-by-side. For this example, I'm using string and blue yarn to provide some contrast. Although, please note, for the sake of this illustration I have not placed beads on the string.

2. MAKE THE FIRST ADJUSTABLE KNOT

To make the adjustable knot, cut a piece of your stringing material (my blue yarn) about 12 inches long. I'm going to walk you through forming the loops. As you can see, one end of the blue yarn is pointing up and to the right and one is pointing down and to the left.

The top blue section is placed on top of the two bracelet cords and under the blue loop. The bottom section is placed under the two bracelet cords and over the blue loop

3. MAKING THE SECOND ADJUSTABLE KNOT

For the second knot, the top section of the blue yarn forms a loop that sits over the two bracelet cords. The bottom section of the knot material forms a loop that goes over the top blue section, under the two bracelet cords and under, then over the top blue looped section.

4. FINISHING THE ADJUSTABLE KNOT

Repeat the first and second knotting instructions until your knot is at least 1/2 inch long. Tie an overhand knot on either side of the blue knotting material and trim close to the knot. Glue the overhand knots in place with some quick-set glue.

Caution: Be careful to not get any glue on the bracelet cords. If you do, the bracelet cords will not slide back and forth, defeating the purpose of the adjustable knot. If your bracelet cord tails are excessively long, trim them equally on both sides.

5. Place a spacer bead on either end of the bracelet cords, tie an overhand knot on each end of the bracelet cords and secure in place with a dot of quick-set glue.
